In 1919, the brother of the Indian trader J.L. Hubbell was shot to death at a trading post near Tolani Lake. Part history, part true crime, *The Sons of Gunshooter* reexamines the killing and subsequent murder trial, while simultaneously embedding the story in a much larger saga of colonization and resistance. The result is a book that's sweeping in its scope and surgical in its approach. Rewinding the clock to 1868, the authors follow the intertwining paths of the Hubbells and a prominent Diné family to offer a riveting, deeply personal account that has been hailed as "a new way of doing historiography."
